

**REMARKS**

Applicant noted that the specification as filed did not include a written description of the FIGs. 12, 13 and included a partial description of FIGs. 9 and 14. Applicant notes that in paragraph 42, the descriptions of FIG. 9 and FIG. 14 were inadvertently run together. This is demonstrated by the fact that at the beginning of the paragraph, the reference numerals do not include any primes, but by the end of the paragraph, the reference numerals in the specification include three primes. Thus, the description of FIG. 9 (which includes '900' series reference numerals without any prime marks) and FIG. 14 (which includes the same '900 series' reference numerals with three prime marks) were somehow combined through a processing error. Through this error, the full written description of all of the reference numerals of FIG. 9 and cross-reference to FIG. 12 (which includes similar '900' series reference numerals to FIG. 9) and the description of FIG. 13 (which includes the '900' series reference numerals with two prime marks) were also excluded.

Applicant respectfully submits that the amendments to the specification do not add any new matter as the amendments merely provide a written description to the drawings which were included with the as-filed application. Further, FIGS. 9, 10, 12, 13 and 14 all include similar '900' series reference numerals and thus one would understand that the reference numerals designate similar elements.

Applicant respectfully submits that no new matter has been added. The Applicant again requests entry of the amendments as set forth in the Appendices hereto prior to examination of the application on the merits.

Respectfully submitted,

Krista Weber Powell
